

WINTER CIRCULAR HIKE ON THE GOTTESACKER

medium

Winter Hiking

TOUR DESCRIPTION

This winter hiking trail is the highest winter hiking trail in the Kleinwalsertal valley at an altitude of around 2000 meters. The winter hike is a U-shaped trail and the bizarre shapes of the snow dunes in the karst landscape. The trail can be reached with the Ifen cable car; from the Auenhütte at the top of the cable car, a signposted, groomed panoramic circular trail leads towards the Gottesacker plateau. After a short time on the hiking trail among the numerous snow dunes, the trail leads to the Gottesacker. This probably best-known karst area in the Alps enchants in winter with the bizarre shapes of the snow dunes in the karst landscape. The circular hiking trail is prepared for a 5 km hike and a 3 km hike.

ROUTE DESCRIPTION

As soon as we have arrived at the mountain station with the cable car, we can start! We keep to the right and follow the hiking trail signs to the top of the mountain. From there, we have a gigantic view of the highest winter hiking trail in the Kleinwalsertal, which can be reached by train and which will be with us from now on.

How do you consciously experience nature?

Nature is so much more than the backdrop for unforgettable mountain experiences. It is a habitat for animals and plants. It provides valuable raw materials such as wood, it also protects against avalanches and mudslides and regulates the climate. It is up to us to see what we can achieve more:

Smart in NATURE

CONSCIOUS together

EXPERIENCE foresight

Smart in NATURE

Take a deep breath and recharge your batteries, be outside and feel free. When we enjoy nature, we are guests in the living room of someone's living space with you in the future too.

Stay on paths and marked routes

If you follow the marked paths and routes, you are sure to come to new favorite places. In this way you also respect protected areas, any disturbance unnecessarily costs the wild animals the strength they need to survive.

Avoiding twilight times

Standing on a mountain at sunrise is a special experience. The morning and evening hours are also the time when most wild animals are avoided, please stay on the marked path, do not use a bright headlamp and enjoy the silence.

Stay clean & take rubbish with you

It goes without saying: You take rubbish with you again, on the mountain and in the valley. Please also organic waste, because it is common at home or in your accommodation - please remember that there are no rubbish bins in public spaces in Kleinwalsertal.

On the natural toilet

If you are looking for a quiet place, please be at least 50 m away from water. Bury excrement or cover it with a large stone. Use fallen

On tour with a dog

Are you always in control of your four-legged partner, even if he gets his nose for marmots, deer or other wild animals? You are both on guard against an attack by a grazing animal is foreseeable: leash off immediately. There are numerous dog stations in the valley for the disposal of dog waste and fields contaminated by the feed and makes grazing cattle sick.

CONSCIOUS to each other

Consideration for other athletes and those looking for relaxation

Everyone loves to enjoy a special piece of earth for themselves. But most of the time we are not traveling alone. No problem, because in a friendly manner, provide support when someone needs help and always give a smile. So nothing stands in the way of friendly cooperation and

Appreciating the preservation of the cultural landscape

Alpine landscapes are touching with their contrast: Imposing peaks and natural forests alternate with gentle valleys, well-tended meadows at high altitudes is no coincidence, but the result of an interplay of natural and cultural landscapes. Behind this is the work of farmers, alpine herders. The attractiveness of the recreation and leisure area and the diversity of species are preserved. We already say thank you if we stay on the

EXPERIENCE farsighted

Safe on tour - for you and others

Whether on a ski or snowshoe tour in winter or on a mountain tour in summer, anyone who is out and about in alpine terrain has to be equipped with the right equipment. Correctly assessing alpine dangers requires a lot of knowledge and experience. Why not learn from professionals?
